

### Glasurit® PRO Active Wipes

- Application:** Glasurit® PRO Active Wipes are intended for use on cleaned bare metal surfaces such as steel, galvanized steel and aluminum.
- Properties:** Thanks to their chemical reaction in contact with metal surfaces, Glasurit® PRO Active Wipes increase the corrosion resistance and adhesion of the paint system to be applied.
- Remarks:**
- Recoatable with all Glasurit® undercoat materials, except polyester body filler and waterborne products (176-72).
  - Do not overcoat directly with basecoat or topcoat.
  - If you want to reuse used wipes during the same working day, store them in a container or in a resealable plastic bag. This will protect the wipes from drying out. Do not return used wipes to the original packaging.

	<b>Paint system</b>	Observe process-related regulations. Use on cleaned bare metal surfaces only.
		<b>Spreading rate:</b> per cloth max. 3m <sup>2</sup>
	<b>Carefully seal container</b>	Close the container immediately after removing a PRO Active Wipe to protect the other wipes from drying out.
	<b>Cleaning</b>	700-10, 700-1 (see relevant refinishing system)
	<b>Application</b>	Evenly wet the entire bare metal surface with 360-100. (Wipe with overlapping single cross coats). The surface must stay moist for at least 1 minute. This is imperative for the chemical reaction to complete and form a passivation layer.
	<b>Flash-off at 20°C</b>	Matt surface Max. 8 h
		Can be overcoated with all Glasurit® undercoat materials, see technical data sheet or refinishing system

**Safety advice:**

The products are suitable for professional use only.

It cannot be ruled out that this product contains particles < 0.1 µm.

**2004/42/IIIB(c III)(780)8:** The EU limit value for this product ( product category: IIB.c III ) in ready to use form is max 780 g/litre of VOC. The VOC content of this product is 8 g/litres.
