

522-MC 600

Variant 522-78

A brand of BASF –
We create chemistry

Application:	Additive 522-78 to be used when 22 VOC MC600 is applied by brush or roll.
Key Features:	For brush and roller application, mix 22 VOC MC600 topcoats with 929-13 only. Other hardeners will thin the product too much. 522-78 improves the flow properties of 22 Line VOC topcoats and prevents aeration in the applied film.
Remarks:	Only partly suitable when large areas are to be refinished as ready-for-use material dries very fast on the surface.
