100-E 5X

Reducer

Application: Reducer for 100 Line for high temperatures, low humidity and/or big surfaces

Key Features: For both, effect and solid colors (with 100-M 10X / 100-M 20X), 100-E 5X Reducer is used. The mixing ratio of basecoat to reducer is 2:1 by volume. Alternatively, you can use the computerized scales with

Profit Manager to adjust the material in the usual manner by weight. It is important to mix the mixing bases and the mixing clear and stir before the reducer is added. After adding the reducer, the ready for use material has to be stirred again. With the exchange of the Mixing clears 100-M 10X and 100-M 20X to 100-M 10 and 100-M 20 as well the reducer has to be exchanged. The corresponding reducer is 100-E

5.

Remarks: Please refer to the Glasurit Know How module "Glasurit 100 Line" for further details and information

about application processes.

Please note: For automotive refinish, repair instructions of vehicle manufacturers, in particular regarding installed sensor technology, must always be observed in addition to the processing instructions given within this document.
